Professional Summary

Front-End Developer with **18+ years** of experience building and maintaining complex, high-reliability web applications. Deep expertise in React and TypeScript for sophisticated, state-heavy interfaces, combined with practical full-stack experience across Java/Spring and modern JavaScript ecosystems. Proven ability to troubleshoot production issues under pressure, collaborate closely with architects and cross-functional teams, and leverage Generative AI (Claude Code) to accelerate development, documentation, testing, and architecture decisions. Strong track record delivering reliable, scalable solutions for high-traffic platforms and streaming services.

Technical Skills

Frontend: React, TypeScript, Redux, Zustand, React Query, React Router, Tailwind, Material UI, Chart.js, Leaflet
Backend & Full-Stack: Java, Spring Boot, ASP.NET, RESTful API integration
Data & Logging: JSON-based data modeling, high-throughput logging patterns
AI-Augmented Development: Claude Code (agentic generation, documentation, testing, architecture), GenAI tooling
Media & Streaming: JW Player, HLS.js, live event interfaces, real-time state management
Practices: Performance optimization (Google Lighthouse), automated testing (Jest, Vitest, Webdriver.IO), Git workflows, high-reliability systems

Professional Experience

Senior Front-End Developer

Squanto — Los Angeles, CA (Remote)
October 2025 – Present

- Serving as the sole Front-End Developer responsible for the entire web UI of squanto.app, a live entertainment marketplace connecting event hosts, performers, and audiences

a live entertainment marketplace connecting event hosts, performers, and audiences.

- Establishing and maintaining complete frontend architecture, routing conventions, design patterns, and spec-driven development while leveraging Claude Code for agentic code generation, rapid prototyping, documentation, and test coverage.
- Supporting rapid delivery from initial development to soft launch by integrating real-time mapping, data visualizations, analytics, and hybrid mobile (PWA/Cordova) capabilities.
- Partnering directly with the CEO and systems architect in live debugging sessions to maintain system reliability.

Live product: https://squanto.app/

React/CMS Developer (Contract)

Trinity Broadcasting Network — Fort Worth, TX (Hybrid)
June 2023 – August 2024

- Led React/TypeScript frontend development for TBNPlus.com and MeritPlus.com subscription streaming platforms, owning complex user flows including authentication and payment integration.
- Collaborated closely with backend engineers on Okta and Stripe integration while troubleshooting and optimizing UI performance and reliability.
- Provided technical support and maintenance for TBN.org and supporting microsites using WordPress and Drupal CMS.

Platform: https://www.tbnplus.com/

Front-End Developer (Contract)

AWS QuickSight — Seattle, WA (Remote)
July 2022 – May 2023

- Developed, updated, and troubleshot React, Redux, and TypeScript UI components for AWS QuickSight, a large-scale business intelligence and data visualization platform.
- Delivered production components under strict testing standards and collaborated on cross-functional prototypes.

Front-End Developer (Contract)

FOX — Los Angeles, CA (Remote)
June 2020 – May 2022

- Maintained and enhanced the FOX Web Player (powered by JW Player) used across

FOX.com, FOXSports.com, FOX Nation, and other properties serving millions of users.

- Diagnosed and resolved complex UI and WebView issues, including channel branding and compatibility on Xbox and Chromecast.
- Implemented analytics tracing and performance improvements through close coordination with engineering teams.

Front-End Developer (Contract)

ADP — Pasadena, CA
November 2019 – May 2020

- Built and maintained React components and pages for myWisely, ADP's direct-to-consumer debit card platform and hybrid mobile application, delivering reusable UI components for both browser and mobile webview environments.
- Implemented testing with Jest and Selenium Webdriver alongside Material UI, Webpack, and Redux state management to ensure reliable, scalable frontend architecture.

Front-End Developer

FOX Sports (FOX Corporation) — Los Angeles, CA
March 2012 – August 2019

- Front-End Developer on the FOXSports.com team for a leading high-traffic sports media platform covering NFL, MLB, NBA, NCAA, FIFA World Cup, US Open, and the Olympics.
- Contributed to multiple full-site redesigns and CMS migrations, working with proprietary Java Spring backend systems to deliver JSON/HTML output.
- Built and supported complex interactive features including live scoreboards, event brackets, newsletter tools, ad integrations, and companion video players using JavaScript, React.js (partial integration), JW Player, and Webpack.
- Supported high-reliability media operations through performance optimization, analytics implementation, and on-call Pager Duty coverage during major live events and channel launches (including FS1).

Platform: https://www.foxsports.com/

UI Engineer

Medversant Technologies LLC — Los Angeles, CA
May 2008 – February 2012

- Primary UI Engineer responsible for designing and building the complete frontend of ProviderSource.com, a pioneering SaaS medical credentialing platform

ProviderSource.com, a pioneering SaaS medical credentialing platform.
- Developed complex form-heavy interfaces and internal web applications to support large-scale data processing workflows.

Portfolio & Notable Projects
